0.9% Normal Saline
Instructions For Use

NAME

0.9% Normal Saline

PRODUCT CODE

IN-100

SPECIFICATION

100mL

DESCRIPTION

The main component of physiological saline is sodium chloride, with a molecular weight of 58.44 and a molecular formula of NaCl. 0.9% physiological saline is a 0.9% NaCl solution, abbreviated as SPSS, which stands for Stroke-physiological Saline Solution. Because its osmotic pressure is equal to that of human plasma, it is a commonly used salt solution for in vitro culture of living tissues and cells.

This product has been sterilized by filtration and can be used directly in aseptic operations.

STORAGE & SHELF LIFE

Store at room temperature, valid for 3 years.

WARNINGS & PRECAUTIONS

1. For your safety and health, please wear a lab coat and disposable gloves.
2. Please use the reagent as soon as possible after opening to avoid affecting the subsequent experimental results.
3. This reagent is only used in scientific research and is not suitable for clinical diagnosis or other purposes.
